Infrastructure Management	Single MSP <i>complex migration required to change provider</i>	Any MSP <i>no migration required to change provider</i>
Infrastructure Performance	Fixed or Flexible <i>provision usually for current requirements only</i>	Flexible <i>provision easily modified for new requirements</i>
Infrastructure Cost Model	Normally Fixed <i>unchanged with modest usage fluctuations</i>	Variable (but predictable) <i>scales up/down by user volumes and their usage</i>
Infrastructure Scalability	Good <i>limited by procurement and hardware upgrades</i>	Excellent <i>instant provision</i>
Infrastructure Architecture	Single- or multi-tenant <i>based on client preference</i> Citrix-based <i>recommended for enhanced performance</i>	Single- or multi-tenant <i>based on client preference</i> Citrix-based <i>recommended for enhanced performance</i>
Licencing Cost Model	Pay per user/month	Pay per user/month

PRIVATE CLOUD DaaS

Some firms will prefer to stay with what they know and trust, or perhaps their CMS is dictating their choice. Atlas Cloud understands this and that's why our private cloud data centre isn't going anywhere. We remain committed to provisioning and servicing highly performant Private Cloud Virtual Desktops for our customers in the legal sector.

AZURE VIRTUAL DESKTOPS (AVD)

This emerging technology can dramatically reduce the cost of ownership of IT and its ability to scale quickly and easily will help accelerate M&A transition. Azure's uptime provides greater business continuity – especially assuring for conveyancers on those all-important Fridays.
